

"The next thing in technology ...
Is not just big but truly huge:
the conquest of complexity."

Andreus Kluth from "Make it Simple," The Economist

Thank you for your interest in Wizard Software Solutions. Since 1991, our mission has been to make teams more productive by developing powerful business software that is simple to use.

Here are a few simple reasons more and more owners, design & construction staff, facility managers, and real estate professionals are discovering and enjoying the benefits of our software solutions:

Reason 1: Simplicity Drives Productivity.

Our #1 advantage is that users feel comfortable with our software. We minimize the number of clicks necessary to enter, find, and report data. This results in your team getting their work done as quickly as possible.

Reason 2: Powerful and Scalable.

Wizard Software solutions are built for performance and scalability. Our systems routinely handle 1,000s of projects, properties or assets, or even 100,000s of A/P, A/R, or purchasing and financial transactions or work orders without breaking a sweat.

Reason 3: Connect to Your Enterprise Data.

It's your data. It shouldn't be that much of a challenge. The Wizard Software platform uses industry-standard technologies to reach out, connect and integrate with your enterprise ERP systems such as Oracle, PeopleSoft, Lawson, and SAP. We make it surprisingly simple to work with information that's typically not easy to get to.

Reason 4: Agile to Fit Your Workflows.

We respect the unique needs and security requirements of every organization by building a unique database for every client and not comingled with other customers. Your software can work 'out of the box', but this approach means agility – so your system can be easily tailored to your unique processes and workflows.

See Wizard Software in Action.

There are many more reasons that Wizard Software is your smartest choice. The lowest TCO. Expert consulting and training. We can't fit them all on a single sheet of paper, and there is no substitute for seeing our software in action. So we encourage you to visit wizardsoftware.net and give us a call to schedule a demonstration.
